Grenfell Tower - wrapping and illumination

Grenfell Tower will be fully wrapped ahead of the first anniversary of the tragedy. The existing white covering will continue up to the 20th floor and banners, designed in collaboration with groups from the community, will cover the top four floors of the building

There are plans to illuminate Grenfell Tower as part of a wider initiative to mark the passing of one year since the fire. The specific proposal is for green lights at the base of Grenfell Tower to illuminate all four sides. Light pollution is not expected to be a significant issue, however the site team is working with the community to make sure it is safe and does not cause disruption to local people.
